

Sunrise Testimonials

Working in an orthopedic clinic, I see a variety of patients. The Sunrise Extender works great, especially with the more difficult patients. We often see heavier patients that cannot reach the cassette to set it close enough to the knees for a quality exam. The Sunrise Extender gives them the extra length they need to put it in the proper place. Another situation where the Sunrise Extender is extremely helpful is when you have a patient with short arms. The extender is an excellent device that can help correct all of these problems. It practically guarantees every time that you will not need to repeat the x-ray.

Kisha Troumbly, R.T.(R), The Summit Center, Flagstaff, AZ

The thing I appreciate the most about the Sunrise Extender is that it enables my elderly patients to get through the exam without struggling to hold the cassette. The Sunrise Extender does a great job of stabilizing the cassette, resulting in an x-ray with better detail. It not only makes the exam more pleasant for the patient, it also makes my job a lot easier.

Sally Tomes, R.T.(R), Flagstaff Medical Center, Flagstaff, AZ

A simple solution for obtaining outstanding axial knee "sunrise" views either portable or in the department!!

Stephen Hartz, M.D., Flagstaff Medical Center, Flagstaff, AZ

I have been using this device for several months. It is comfortable for my patients and yields consistent, clear, reproducible images.

Bert McKinnon, M.D., Flagstaff Bone and Joint, Flagstaff, AZ

The thing I like best about the Sunrise Extender is that it eliminates the need to have another person hold the cassette during the procedure; removing the circumstance of unnecessarily exposing a second party to radiation. Instead of grabbing a lead apron, I grab the Sunrise Extender!!

Adam Mathias, R.T.(R), Flagstaff Medical Center, Flagstaff, AZ

As the sole x-ray tech on the graveyard shift, I am glad to have a Sunrise Extender handy. It has not only made performing knee exams much easier but faster, which allows me to crank out more exams. It's a total no brainer!! This device really works. It has made an incredible transformation in the way I work.

Ryan Kuhlman-Eaves, R.T.(R), Flagstaff Medical Center, Flagstaff, AZ

I now use the Sunrise Extender every time I need to do a sunrise view on my patients. I appreciate the ease of use and the lack of discomfort that my patients would otherwise experience when doing a traditional sunrise view. I'm glad I found this product.

Robin Roberts R.T.(R)(CT), Flagstaff Medical Center, Flagstaff, AZ

The Sunrise Extender is a simple solution for obtaining views of the patellofemoral joint space. It's easy to use and, more importantly, comfortable for the patient. I highly recommend it!

Darius Moezzi, M.D., Flagstaff Bone and Joint, Flagstaff, AZ

This device makes getting a good sunrise view of the patella an easy, one tech exam.

Ken Reid R.T. (R), Flagstaff Medical Center, Flagstaff, AZ

The Sunrise Extender is great! It combines patient comfort with consistent x-rays.

Dave Brown, P.A., Flagstaff Bone and Joint, Flagstaff, AZ

The Sunrise Extender has improved the efficiency of our radiology department. More importantly, it produces consistently excellent sunrise views.

Torey Botti, M.D., Flagstaff Bone and Joint, Flagstaff, AZ

The Sunrise Extender is a valuable addition to our office. Patients appreciate being able to participate more actively in their care, and the Sunrise Extender affords them that opportunity. Furthermore, the quality of images produced is consistent and superior, minimizing waste in repeat imaging. It is an inexpensive and effective way to provide safety and comfort for your patients.

Amber Randall, M.D., Flagstaff Bone and Joint, Flagstaff, AZ

Having ordered "sunrise" patella views as an Orthopaedist for over thirty years and recently having had the pleasure to be able to use the Sunrise Extender, I can categorically say that this device produces the fastest, highest quality sunrise patella views of my lifetime of innumerable patella x-ray studies.

Francis Maher, M.D., Flagstaff Bone and Joint, Flagstaff, AZ
